CK STUDIO

Website Image & Video Brief

Everything the designer needs to deliver for ckstudio.org

Prepared for: CK Studio designer / creative team

Website: https://ckstudio.org (2026 redesign — white, cinematic, scroll-animated)

Date: 21 October 2026

Contact: CK Studio · +91 9700 970 762 · ckstudio.org@gmail.com

1. At a glance

The website has been fully redesigned with a pure white background, large bold type and scroll-driven animation. It is already live and works without these files — each item below replaces a temporary placeholder. Please deliver in the priority order shown.

Priority	Item	What it replaces on the site	Section
1 — Highest	Hero video (desktop + phone + still)	The dark placeholder "screen" in the first section	3
2	Portfolio thumbnails + video links (11 projects)	"Visuals coming soon" cards	5
3	About photo	The grey "Image needed" box in About Us	4
4	Final logo files	The current logo (recoloured by the site)	6
5	Icons + link-preview image	Temporary versions made from the current logo	6
6 — Optional	Better thumbnails for 6 existing videos	Automatic YouTube stills	5
7 — Optional	Partner logos (all 15)	Partner names shown as text	7
8 — Optional	Blog cover images (7)	Designed red/black number covers	8

2. Brand colours and general rules

Brand palette

	Colour	Hex	Used for
	White	#FFFFFF	Background of the whole website
	CK Red	#8B0000	Headlines, key words, buttons and the logo
	Black	#111111	All other text
	Gold	#D4AF37	Rare, special moments only — never as a main colour

Note: Gold is deliberately rare on the site. Please do not build artwork around gold; red and black on white is the core look.

General rules for every file

- Lowercase file names with hyphens, no spaces — use the exact names in this brief (e.g. hero-desktop.mp4).
- Photos and thumbnails: webp preferred, jpg accepted. Logos and icons: svg preferred, transparent png otherwise.
- Keep images under 500 KB each unless stated otherwise (export at good quality — we optimise further).
- Use real CK Studio work, team and production stills. No generic stock photos or generic "AI art".

- No text inside images, except official logos or real poster artwork. The website adds headings and labels itself.
- Everything must look good on a white background.

3. Hero video (highest priority)

The first section of the website shows a "screen" that grows to full size as the visitor scrolls. The video inside it does not play by itself — it moves forward and backward with the visitor's scrolling, like flipping through film frames. This is why it must be one smooth, continuous shot.

	Requirement
Desktop version	1920 × 1080 px (landscape), 5–8 seconds
Phone version (recommended)	1080 × 1920 px (vertical), same content reframed for phones
Motion	One smooth, continuous shot. No cuts, no fast movement, no flashing. Slow, steady motion looks best when controlled by scrolling.
Start and end	Starts on pure white (or fades in from white) and ends by fading back to white, so it blends into the page.
Text / logos	None inside the video — the website places the headline "Where AI Meets…" around it.
Sound	None (the video is always silent).
Format	MP4 (H.264), the highest quality export available. Our side converts it for smooth scroll-control, so do not compress it heavily.
Still image	One frame from the video, 1920 × 1080 px, webp or jpg — shown while the video loads.
File names	hero-desktop.mp4 · hero-mobile.mp4 · hero-poster.webp

Content ideas

- A slow camera move through the CK Studio edit suite or set, ending on a monitor.
- A cinema lens turning, with the reflection changing from a real scene into an AI-generated world.
- A single film frame that "develops" from sketch → storyboard → AI pre-look → final graded shot.
- A product or character slowly revealed by moving light.

Note: The headline sits above and below the video in red and black, so keep the most important part of the picture in the centre of the frame.

4. About Us photo

	Requirement
Size	1200 × 1500 px (tall, 4:5)
Format	webp or jpg, under 500 KB

	Requirement
Subject	A real photo of the CK Studio team, studio, edit suite or a shoot in progress
Composition	Keep the bottom-left corner calm — a small white label "AI-Powered · Next-gen film production technology" sits there. The image slowly drifts inside its frame, so leave a little extra around the edges.
File name	ai-film-production.webp

5. Portfolio

A. Projects currently showing "Visuals coming soon" (needed)

For each project, please provide a thumbnail and the video link. Please also confirm the label shown above the title (for example Teaser, Lyrical Video, Ad Film, Event Film).

Group	Project	Thumbnail file name	Also needed
Movies	Beach Road Chethan	beach-road-chethan.webp	Video link (YouTube or other) + label
Movies	Bhima	bhima.webp	Video link (YouTube or other) + label
Movies	Beauty	beauty.webp	Video link (YouTube or other) + label
Commercials	Gangothri Ad	gangothri-ad.webp	Video link (YouTube or other) + label
Commercials	Plasil Organics	plasil-organics.webp	Video link (YouTube or other) + label
Commercials	Vande Media	vande-media.webp	Video link (YouTube or other) + label
Commercials	Pride of Bharat	pride-of-bharat.webp	Video link (YouTube or other) + label
Events	AIROC	airoc.webp	Video link (YouTube or other) + label
Events	OBR	obr.webp	Video link (YouTube or other) + label
Events	Jayaho NTR	jayaho-ntr.webp	Video link (YouTube or other) + label
Events	CMMA	cmma.webp	Video link (YouTube or other) + label

Note: Thumbnail size for every portfolio item: 1280 × 720 px (16:9), webp or jpg. Use a real still or the official poster frame, not a collage of text.

B. Projects already showing (optional upgrade)

These currently use YouTube's automatic still. A designed 1280 × 720 px thumbnail would look sharper and more consistent.

Project	Label	Thumbnail file name
Baali Movie Teaser	Movie Teaser	baali-movie-teaser.webp
Odela 2	Lyrical Video	odela-2.webp
Seetimaar Lyrical Song	Lyrical Video	seetimaar-lyrical-song.webp
Ugly Story Lyrical Songs	Lyrical Video	ugly-story-lyrical-songs.webp
Babu Bullshit Guy Lyrical Songs	Lyrical Video	babu-bullshit-guy-lyrical-songs.webp
Aajyam Lyrical Song	Lyrical Video	aajyam-lyrical-song.webp

C. New projects (whenever available)

For any new project to add, send: title, group (Movies, Commercials or Events), label, a 1280 × 720 px thumbnail and the video link.

6. Logo, icons and link-preview image

Temporary versions of the icons and link-preview image were generated from the current logo on 21 October 2026 so nothing appears broken. Final designer files with the names below will simply replace them.

Item	Size	Format	File name
Master logo	Vector (any size); PNG on a 2048 × 1152 px canvas	svg + transparent png	logo.svg · logo.png
Header logo	512 × 288 px (same 16:9 canvas)	svg or transparent png	logo-header.png
Dark-background logo (optional)	Same as master	svg + transparent png	logo-white.png
Browser icon (favicon)	32 × 32 and 48 × 48 px	png (or svg / ico)	favicon-32.png · favicon-48.png
Phone home-screen icon	180 × 180 px, white background	png	apple-touch-icon.png
App icon	512 × 512 px, white background	png	icon-512.png
Link-preview image	1200 × 630 px	jpg	og-image.jpg

Logo notes

- Please confirm the official logo colour. The current logo file is bright red (#FF0303); the website shows it in brand red #8B0000.
- List any fonts used inside the logo artwork.
- Icons must stay readable at 32 × 32 px — the "CK" mark alone usually works best.
- The link-preview image is what people see when ckstudio.org is shared on WhatsApp, Facebook, LinkedIn or X. Keep important content away from the edges (some apps crop it).

7. Partner logos (optional)

The Partners section currently shows names as large moving text. To switch to logos, all 15 are needed, together with each partner's permission to display their logo.

- Two versions of each: full colour, and single colour (black or brand red) for the white site.
- svg preferred; otherwise transparent png at least 1000 px wide (horizontal logos) or 800 × 800 px (square marks).

#	Partner	File name (single colour)
1	Gangothri Nutrients & Fertilizers	gangothri-nutrients-fertilizers.svg
2	Vande Media	vande-media.svg
3	Pride of Bharat	pride-of-bharat.svg
4	Plasil Organics	plasil-organics.svg
5	Gangothri InfraEdge	gangothri-infraedge.svg
6	Palik Studios	palik-studios.svg
7	Sampathnandhi Teamworks	sampathnandhi-teamworks.svg
8	Kuviyam Mediaworks	kuviyam-mediaworks.svg
9	Aswini Media	aswini-media.svg
10	AIROC	airoc.svg
11	Harivillu Developers	harivillu-developers.svg
12	CM Productions	cm-productions.svg
13	Hindu Law Firm	hindu-law-firm.svg
14	LN Associates	ln-associates.svg
15	Shree Radha's VS Group	shree-radhas-vs-group.svg

8. Blog cover images (optional)

Each article currently has a designed red/black number cover. Real covers can replace them.

- Size 1200 × 800 px (3:2), webp, under 500 KB.

- Cinematic and production-themed (sets, cameras, edit suites, colour grading, film frames). No generic abstract "AI" imagery, no text in the image.

9. How to deliver

Please send one folder (Google Drive, WeTransfer or similar) organised like this:

Folder	Contents
hero/	hero-desktop.mp4, hero-mobile.mp4, hero-poster.webp
about/	ai-film-production.webp
portfolio/	All portfolio thumbnails, plus a text file listing each project's video link and label
branding/	Logo files, icons, og-image.jpg, and a note on logo fonts and colour
clients/	Partner logos (only if all 15 are available, with permission)
blog/	Blog covers (optional)

Final checklist

- File names match this brief exactly (lowercase, hyphens).
- Sizes are correct, and everything looks good on white.
- No stock photos, no text baked into images.
- Hero video: one smooth shot, 5–8 seconds, silent, starts and ends on white.
- Every portfolio thumbnail comes with its video link and label.
- Permission confirmed for any client logos or client footage used.
